LATE PIEDMONT RECORD FOR THE PALM WARBLER

Julian L. Dusi and Rosemary D. Dusi

On 9 June 1984, we recorded a singing male Palm Warbler, Dendroica palmarum, where Tallapoosa County Route 34 crosses the South Fork of Sandy Creek (Township 21 N; Range 23 E, Section 14) southwest of Dadeville, AL. The Palm Warbler was singing while the count was being made. After the 3-minutes of listening, we called up the male into the open, where we observed it from about 4 m distance for several minutes as it sang again.

Imhof 1976, in the second edition of Alabama Birds, gives May 10 as the latest Piedmont record. This observation extends the spring date to June 9.

BIRDLIFE AT THE DAUPHIN ISLAND AIRPORT FROM 18 JULY TO 17 AUGUST 1983

Tommy King and John R. Porch

INTRODUCTION

The Dauphin Island Airport is well known as an important birding area for marsh and shore birds along the Alabama coast. To our knowledge no literature (with the exception of individual checklists) has been published discussing birdlife at the airport. The purpose of this
